

Business proposal for sole distributor, Bangladesh

German-engineered lubricants for cars, bikes, trucks and industry. One partner to import, distribute and build the Wagner brand nationwide.

Partner presentation · 2026

What this proposal covers

01 Opportunities

Sectors Wagner can serve in Bangladesh

03 Sole distributor responsibilities

Import, distribution, corporate, B2B, B2C and e-commerce

05 Marketing policy

Who runs what, and the marketing budget

07 ERP system

How stock and orders are tracked

02 Market share

Size of the market and the branded share

04 Sales policy

Container targets and annual incentive

06 Sole distributor profitability

Margin, incentive, investment and ROI

Engineered in Germany to cut wear to the minimum

Wagner Spezialschmierstoffe GmbH & Co. KG is based in Wechingen, Bavaria. Founder and engineer Walter Wagner has spent more than 25 years developing lubricants and coolants that reduce friction and wear, extend service intervals and lower maintenance costs for cars, heavy trucks and industrial plants.

25+ yrs

of lubrication research behind the range

40+

countries where Wagner is sold

9

product families, from engine oils to coolants

Already building partnerships across the region

At Automechanika Dubai, 10-12 December 2024, Wagner met distributors and certified authorised partners from across the Middle East and beyond.

Opportunities

Six sectors drive lubricant demand in Bangladesh. Wagner's current range covers the first four directly.

Automotive EvoMaX · CargoX · MotoX · TransX · DriveX Cars, bikes, buses and trucks in workshops and retail.	Industrial HYD hydraulic oils · GEAR industrial gear oils Factories, garments, steel and construction plant.	Power CargoX heavy-duty diesel · Xtreme Cool Diesel generators and captive power plants.
Agriculture CargoX · HYD · TransX Tractors, power tillers, pumps and harvesters.	Marine Product fit to confirm River vessels, ferries and port equipment.	Aviation Product fit to confirm Ground support equipment and airport fleets.

One brand for every engine in the workshop

Passenger car engine oils EvoMaX Fully and semi-synthetic, 0W-16 to 20W-50, gasoline and diesel	Heavy-duty diesel oils CargoX CI-4 / E7 grades for trucks, buses, mining and construction	Motorcycle oils MotoX 4T & 2T JASO MA-2 wet-clutch oils, plus 2-stroke
Manual transmission fluids TransX GL-4 and GL-5 gear oils for cars, LCVs and trucks	Automatic transmission fluids DriveX For modern automatic gearboxes and power steering	Hydraulic oils HYD For construction, agricultural and industrial hydraulics
Industrial gear oils GEAR For factory gearboxes and heavy machinery	Brake fluids BRAKE DOT-rated fluids for cars and motorcycles	Antifreeze & coolants Xtreme Cool Premixed 33% and 50%, free of phosphates, silicates and nitrites

Bangladesh lubricant market

An estimated 200 million litres a year across industrial, automotive, power, marine and aviation use. More than half is still unbranded or loose oil.

45%

Branded

International and local brands sold in sealed packs

55%

Non-brand / loose oil

Unbranded, refilled and loose oil. This is the share a trusted German brand can convert.

3%+

expected annual market growth (CAGR) over the next five years

0.5%

first-year market share target for the sole distributor

5

key market segments: industrial, automotive, power, marine, aviation

Responsibilities of the sole distributor

One partner runs every channel for Wagner in Bangladesh.

Import

Import Wagner lubricants directly from Wagner, Germany

Distribution

Appoint local distributors across the country under legal contract

Corporate sales

Build a corporate sales team for industrial and government buyers

B2B

Generate business-to-business sales with fleets, workshops and dealers

B2C & e-commerce

Open Wagner premium shops and sell online

From Wechingen to Chattogram

1

Direct lifting

The sole distributor orders and lifts product directly from Wagner in Germany.

2

Payment by LC

Payment to Wagner through a **100% letter of credit at sight**.

3

Shipment to port

Wagner ships to the distributor's local port. Freight is added to the product cost.

Customs duty, clearance and all other port expenses are handled by the sole distributor without delay.

Coverage in every division, district and thana

Local distribution

Set up local distributors across all divisions, districts and thana markets. **Minimum 50 distributors.** Wagner may audit every market.

Manpower

Staff operations to industry norms and Wagner's advice.

Product placement

Place product with retailers across the country, monitored by the distributor's team. **Wagner audits placement every quarter.**

Corporate and B2B sales

Corporate

Industrial plants and government buyers. A separate, skilled and experienced team manages these accounts.

B2B

Fleets, workshops, dealers and resellers that buy in volume and need regular supply.

Lifting

The distributor lifts product from Wagner by LC and delivers it to clients.

Targets

Wagner sets annual targets for corporate and B2B sales, which the distributor's team delivers.

Wagner premium shops and online sales

Premium shops

Each local area distributor opens a Wagner premium shop in the design set by Wagner. The distributor pays the rent and sells from dealer price to MRP at a good margin.

E-commerce

Keep products listed on several e-commerce sites, backed by social media marketing so buyers know the brand.

Marketing

Brand marketing and promotion for the shops is arranged by Wagner.

Sales policy

Monthly volume, litres (40 ft container = 26,000 L)

Sales target

One 40 ft container (26,000 L) a month in the first quarter, then two (52,000 L) a month from the second quarter. Volume rises with market demand.

Annual target & incentive

30 containers (≈ 8 lakh litres) a year. On reaching it, the distributor earns **1% of total invoice value** at year end.

Growth

Minimum **25% growth a year** in quantity purchased.

Marketing policy

Wagner Global

Runs brand marketing in line with Wagner's global marketing policy.

Sole distributor

Runs local activity to keep sales and visibility growing: sponsorships, ads, banners and digital marketing.

Marketing budget

Wagner contributes a budget with every shipment, calculated in USD.

0.8%

Marketing budget from Wagner of up to 0.8% of the gross order value on every shipment.

Sole distributor profitability

Sales profit of **8–10% per container**, depending on market conditions, after operating costs. Year-one model at 8%:

YEAR ONE	LITRES	TAKA
Annual sales volume (0.5% market share)	10,00,000	
Average selling price per litre		550
Annual sales value		55 crore
Sales profit at 8%		4.40 crore
Target achievement incentive (1%)		0.55 crore

Total profit

Tk 4.95 crore

Why only 0.5% share in year one

- Expanding marketing activity
- Building the brand image
- Recruiting and placing manpower
- Gaining market experience
- Tracking the competition

Profit is after office, manpower, warehouse, logistics, transport and entertainment costs.

Investment and return

Tk 2.5 cr

working investment, about 2.5 containers of stock on average in the first quarter

Tk 4.4 cr

annual return at 8% sales profit

9 months

minimum break-even period

Two months of stock, always rolling

The investment rolls over every month. The sole distributor keeps two months' days of stock(DOS): one month's stock in shipment and one month's stock in the warehouse.

ERP system

Wagner monitors the sole distributor through an ERP system. Five measures are tracked closely.

01

Distributor stock DOS

Days of stock held by the sole distributor

02

Local distributor stock DOS

Days of stock at each local distributor

03

Order management

Orders from local distributors, corporate and B2B clients

04

Delivery tracking

Deliveries from warehouse to market

05

Shipment management

Containers from Germany to port and warehouse

Thank you

Let's build Wagner in Bangladesh together.
